

News Release

State-of-the-art ultrasound system installed at new Harley Street Diagnostic Centre

ACUSON S2000 from Siemens Healthcare enables imaging services for the first time

The Harley Street Clinic in London has completed the installation of a state-of-the-art ACUSON S2000™ ultrasound system from Siemens Healthcare at its new Diagnostic Centre based in Devonshire Street. The installed system enables the private healthcare organisation to offer ultrasound imaging services to the new centre's patients for the very first time.

The ACUSON S2000 is a premier imaging system from Siemens Healthcare and is being used at the Diagnostic Centre as a general ultrasound system. Its powerful imaging functionality gives clinicians the capability to visualise patient tissue in detail, with state-of-the-art high definition transducers providing further ultrasound information.

"The decision to install an ACUSON S2000 ultrasound system at our new Devonshire Street based Diagnostic Centre was made following our positive experience with an S2000 at our primary clinic," explains Fiona England, Deputy Imaging Manager at The Harley Street Clinic. "The S2000 is a user-friendly and powerful imaging system that, thanks to our clinicians' familiarity and contentment with the platform, enables us to offer a high standard of diagnostic services to our patients at the new centre with minimal disruption."

"We are delighted The Harley Street Clinic has chosen to install an ACUSON S2000 system at the new Diagnostic Centre," said Zaheer Ali, Ultrasound Regional Business Manager at Siemens Healthcare. "That the clinic has chosen to purchase the system following previous and positive

experience with an ACUSON S2000 from Siemens Healthcare underlines the level of satisfaction. We look forward to supporting the Clinic into the future. ”
