HER-2/neu

## Improving the Management and Monitoring of Breast Cancer.

Serum HER-2/neu test – a diagnostic tool for personalized medicine

Answers for life.

**SIEMENS**

## The Serum HER-2/neu test, only available from Siemens Healthcare Diagnostics, can indicate whether metastatic breast cancer is progressing or responding to treatment

**Now Available:** Serum HER-2/neu for your ADVIA Centaur® CP System

The Serum HER-2/neu test, a non-invasive blood test available only from Siemens Healthcare Diagnostics, can be used to help monitor a woman's HER-2/neu level once she is diagnosed with metastatic breast cancer. When used in conjunction with other diagnostic procedures, women that have an elevated Serum HER-2/neu level of 15 ng/mL or greater can be routinely monitored with the Siemens Serum HER-2/neu test to help manage their disease. Increasing levels of Serum HER-2/neu may reflect disease progression while decreasing levels may reflect therapy response or stable disease.

**The ADVIA Centaur Systems provide a comprehensive offering of oncology assays:** AFP, BR 27.29, CA 15-3, CA19-9, CA125 II, CEA, Complexed PSA, PSA, Serum HER-2/neu
