

The Right Blend of Speed and Accuracy

Synergies *plus*[®] read-when-ready technology provides same day turn-around for key results while overcoming limitations inherent in fully rapid methods. Susceptibility incubation continues until bacterial resistance is expressed.

In critical situations, turn to a product that provides

- Enhanced resistance detection
- Fast, actionable identifications for optimal therapeutic management
- Same-day susceptibilities for timely communication of critical patient results

Enhanced features come standard

- Susceptibility results can be visually confirmed for added confidence
- Available in Combo ID/AST, MIC, and ID formats
- Automated processing on WalkAway[®] Systems
- Room-temperature storage with 1-year shelf life
- No reagents required

Synergies *plus*

Answers for life.

SIEMENS

Three Technologies—One Panel

The next-generation Combo panel

- Rapid bacterial identifications available in 2 to 2.5 hours—no one is faster
- Read-when-ready technology provides key empiric antibiotic results in as few as 4.5 hours
- Built-in extended antibiotic incubation avoids limitations of rapid products—saves time and reduces cost
- Direct MIC testing optimizes detection of emerging resistance
- 75% of MICs available in 8 hours for common gram-negative and gram-positive bacteria
- More than 80% of methicillin-resistance detected in 8 hours
- Eliminates 24-hour incubation for staphylococcal isolates
- Fewest drug/bug limitations compared to rapid-only AST methods

The perfect laboratory partner—*Synergies plus* with LabPro and Alert_{EX}

- Customize alerts for early proactive intervention
- Flag isolates of public health importance
- Automate laboratory SOPs for consistent follow-up
- Don't wait—transmit results to LIS as ID or AST data become available
