

From client identification to drug-testing to statistical tracking, Siemens can transform your drug-treatment program.

Increase productivity and reduce cost

Using an analyzer decreases turn-around time from hours to minutes and increases drug-testing efficiency. With the fastest method of objective drug testing available, you can make immediate decisions for rewards or sanctions.

Have confidence in your decisions

The gold standard EMIT® technology from Syva® has been trusted for over 40 years as the leading method for urine drug screening. You can be confident that the results are accurate and reliable, allowing for easier decisions and fewer challenges.

Simple and streamlined

Because the Siemens solutions are so easy to use, anyone in your facility can be trained as a drug-testing laboratory technician. And, removing manual steps in administrative processes ensures an easy and effective way to manage your program.

Achieve sustainability

With greater efficiencies and a system to allow growth in your program, sustainability and financial independence is within reach.

Count on unparalleled service

With Siemens, you will receive award winning technical support and service to guide you through your drug testing program. With 24-hour technical assistance, field technical specialists and engineers, and global product support, you can be assured that your testing will continue uninterrupted.

“The instruments work so well—we are able to do a high volume of testing with a very small staff.”

– Debra Jenkins, Program Director
St. Joseph's County Drug Court
South Bend, IN

“As a drug court judge, I found the Siemens testing equipment indispensable because it gave immediate results. Siemens helped us gain up-to-the-minute information about drug use that informed our admission decisions, and our incentives and sanctions.”

– Judge Karen Freeman-Wilson
Former Drug Court Judge
Gary City Court
Gary, IN

“The judges really like to have that hardcopy laboratory result in 10 to 20 minutes. The biggest impact that Siemens has had on our drug court is the turnaround time and having the equivalent of a certified lab result instantly available.”

– Kristie Garrett, Program Director
Cobb County Drug Court
Marietta, GA

Siemens Healthcare Diagnostics, the leading clinical diagnostics company, is committed to providing clinicians with the vital information they need for the accurate diagnosis, treatment and monitoring of patients. Our comprehensive portfolio of performance-driven systems, unmatched menu offering and IT solutions, in conjunction with highly responsive service, is designed to streamline workflow, enhance operational efficiency and support improved patient care.

Revolutionize Your Drug-Testing and Client-Management Program

Answers for life.

SIEMENS

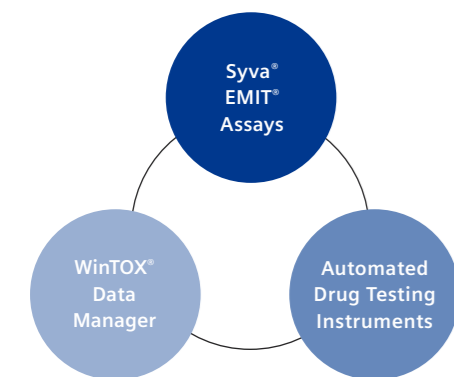

Accuracy, Efficiency, and Accessibility.

Now part of Siemens Healthcare Diagnostics, Syva brings their gold-standard testing and client-management solutions to your drug court program.

Alternative drug treatment programs continually save the Justice system millions of incarceration dollars each year.¹ Today's uncertain economic climate calls for even more cost effective solutions and innovation in drug treatment. Siemens Healthcare Diagnostics offers a comprehensive portfolio of drug testing and client management solutions. Whether you have a small, start up program or a larger, well established facility, Siemens has the right solution for you.

Siemens is helping to streamline drug testing and client management processes within individual treatment programs. Our solutions combine the unparalleled accuracy of Syva® EMIT® technology; the efficiency of automated, walk-away instruments, and the accessibility of data provided by the WinTOX® software.

The Syva Ensemble

The efficiency of a reference laboratory, in your facility

Spend more time with your clients, and less time testing. The automation solutions from Siemens eliminate manual, subjective testing methods, and replace them with fully automated, easy to use drug-testing analyzers. Siemens offers a full line of analyzers to compliment your client's volume and testing frequency needs. With a Siemens analyzer, the results are clear; no more guessing associated with your test results.

Reliable and accurate results for confident decisions

Siemens' analyzers use Syva EMIT technology for high quality, reliable results, so that you can be confident in your sanctions and rewards. Syva EMIT is the gold standard in drug testing used in the majority of SAMHSA regulated laboratories across the country. In addition, the Syva EMIT technology is the only urine drug-screening technology upheld by the Supreme Court.²

Information at your fingertips without file folders

Connect your drug-testing analyzer with data management software from IMS (Integrated Management Solutions) and eliminate time-consuming processes associated with paperwork. Drug testing data is managed by the WinTOX software, which can be fully integrated into the COTTS® case management program. Utilizing the full connectivity and web-based capabilities of the IMS solutions, data can be centrally stored and accessible from anywhere.

Simple steps to revolutionize your program

1. Identify client with the WinTOX software and use the barcoding system to uniquely identify the specimen, thereby ensuring secure chain of custody.
2. Order the appropriate tests using the WinTOX software. Testing options are customizable to program objectives and client-specific drug of choice.
3. Load the sample onto the analyzer and run with a simple mouse click.
4. Results are reported out in as little as 11 minutes, with a clearly defined "POSITIVE" and "NEGATIVE" indication.

5. Results are stored automatically and reports can be tailored to suit the testing request.

6. Reports may be e-mailed or faxed to the appropriate requestor.
