# Obsolescence Protection for Your Investment

Keep Pace with the Future:

# Evolve

Today the performance and functionality of medical equipment are related directly to the software capabilities. With *syngo* software, Siemens provides a comprehensive solution for virtually all the latest medical imaging tasks, applications, and systems. And because software evolves at an incredible speed, your system requires the latest processor technology to realize its full potential. Only by upgrading can you prevent your system's performance from losing ground to the latest state-of-the-art technology.

To help you adapt to the continually changing environment in medical imaging, Siemens now offers the *syngo* Evolve Package with many of its Performance Plans (service agreements). A single package provides you with continuous upgrades of the operating system software and its required supporting hardware. This keeps your investment up-to-date and actually increases your system's imaging capabilities as new developments emerge.

When combined with new applications and technologies, you will enjoy the full benefit of leading-edge performance. Imagine getting a new, more powerful engine for your car after driving it a few years – and the costs are included in your standard service agreement. Rest assured that your patients receive the finest examination with modern, leading-edge technologies from Siemens – because the future is integrated.

The *syngo* Evolve Package enables your system to benefit from advances in performance and efficiency. Continuous enhancement in computer memory technology will ensure that your system performs at optimized speed. The results are shorter examination times and greater productivity.

Updates to the computer platform enable Siemens to offer exciting new product features utilizing the latest software developments. This is just another way the *syngo* Evolve Package helps your system be more efficient and supports you to achieve proven outcomes in the long run.

Siemens Medical Solutions offers the *syngo* Evolve Package for most *syngo*-based medical systems. This innovative program is available for Computed Tomography, Magnetic Resonance, Angiography, X-Ray, Ultrasound and Nuclear Medicine. *syngo* is a registered trademark of Siemens AG

As a pioneer in medical imaging, Siemens knows that today's clinical environment relies on continuous improvements in patient care. To help you meet this goal, we are committed to offering imaging solutions that advance diagnostic confidence and clinical productivity. With the *syngo* Evolve Package, we offer long-term security for your imaging investment to help you stay at the cutting edge of clinical innovation.

The *syngo* Evolve Package ensures access to the latest clinical applications and diagnostic functions, in addition to the computer technology to support them. This keeps your system at the forefront of innovation – at all times – with up-to-date features to boost your performance and optimize your imaging capabilities.

We speak *syngo*

\* In the event that upgrades require FDA approval, Siemens cannot predict whether or when the FDA will issue its approval. Therefore, if regulatory clearance is obtained and is applicable to this package, it will be made available according to the terms of this offer.

Clear and transparent – Evolve Features	At a glance – Evolve Benefits
Continuous software updates and upgrades - Upgrading of operating system - Upgrading of user interface	Continuous improvements in efficiency Increased performance and ease-of-use Extended diagnostic features Prepares your system for new applications
Hardware upgrades	Prolonged system life Investment protection Optimized system capabilities
Integral part of many Performance Plans	Fixed budget

A system's performance remains constant throughout its service life. However, with the *syngo* Evolve Package you can allow your system's performance to keep pace with new technological advancements. Delivering the ultimate in investment protection.
