SIEMENS

Getting the right answers without wasting time and effort is critical for managing in the healthcare arena.

You can be more efficient if you can create your own reports. You can be more effective with quick access to the right information. Imagine being able to display, manipulate, organize, print, and download vital information on demand. Now, with Healthcare Query, you have the chance to get the answers you need quickly and efficiently.

Healthcare Query, an SAP® BusinessObjects™ Web Intelligence® software solution, is an on-demand query reporting and analysis tool. It is designed to empower users with an intuitive interface that will help turn data into actionable information.

With Healthcare Query, you can design a report without having to write complicated query language. Utilizing the drag-and-drop tools provided in Healthcare Query, you can quickly create a report to meet your needs. The data can be qualified based upon many available dimensions, such as date-time and payer.

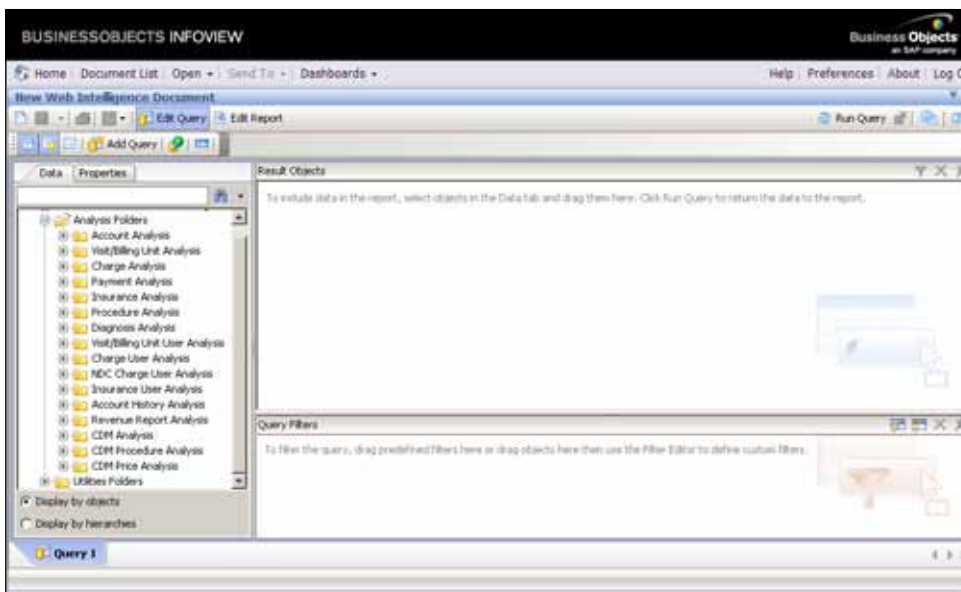

Reporting Made Easy

Reports generated by Healthcare Query can be displayed in a table and/or a graphical chart. The same report can be downloaded onto your workstation and saved in various formats including Microsoft Excel®. Healthcare Query is designed for non-technical professionals, including departmental managers, business office managers, and financial analysts, as well as professional report writers/analysts. It does not require learning complex reporting or coding language. Information is displayed quickly and easily at the workstation. Healthcare Query puts you in touch with the data that you need without IT intervention.

As a result, you can realize the benefits of:

- Widespread user access
- Reduced dependency on IT resources
- Increased productivity
- Lower reporting costs over traditional methods

A universe of data at your fingertips.

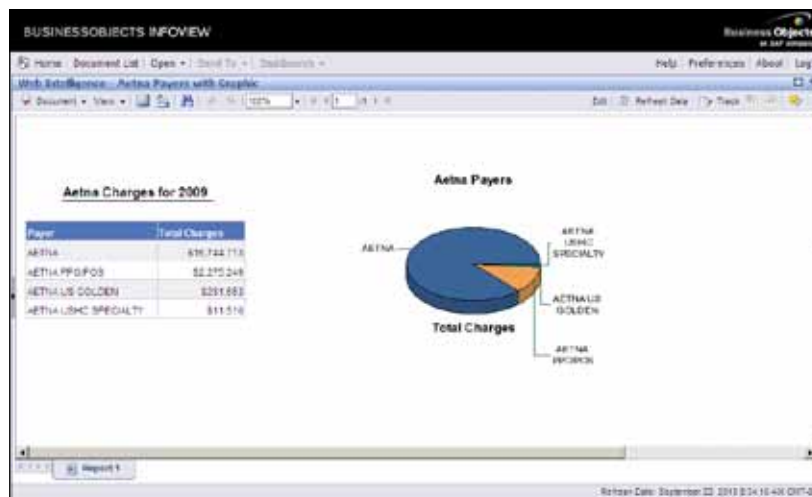

How does Healthcare Query work?

Healthcare Query utilizes cutting-edge technology to offer a secure browser-based solution. It is available as an ASP offering. Workstations require Java Runtime Environment, Microsoft Windows® and Internet Explorer®.

Immediate Access to Data

Healthcare Query gives customers easy access to revenue cycle data from either INVISON® or UNITY®. Data on Charges, Insurances, Payments and Adjustments, National Drug Code, Charge Description Master, Diagnoses, and Procedures, CDM and Revenue, as well as Admission, Discharge, and Transfer.
