

Where ultrasound is moving

SONOLINE Antares Ultrasound System
fourSight 4D Ultrasound Imaging Technology

SIEMENS
medical

We see a way to improve visualization of complex anatomy with imaging planes unattainable in 2D

We see a way to digitally archive complete ultrasound studies 100% of the time

 **Proven Outcomes.** This is what Siemens is helping to deliver right now. Outcomes that result from truly efficient workflow. Outcomes that improve your bottom line. Outcomes that lead to a level of care that feels exceptional to the patient and the care provider. Proof positive of the value of integrating medical technology, IT, management consulting and services. In a way that only Siemens can.

Moving premium performance into the 4th dimension

With superb 2D, 3D, 4D and Doppler imaging capabilities, the SONOLINE Antares™ ultrasound system is the proven, single-system solution that brings another dimension of premium performance to your busy, diverse practice.

Antares *fourSight* 4D

fourSight 4D imaging—fetal face

System Architecture

fourSight™ 4D ultrasound imaging technology provides you with an intuitive, seamless transition between 2D imaging and dramatic 4D studies—helping ensure the highest level of clinical excellence and patient satisfaction. Plus, the flexible architecture of the Antares system means that advanced technologies such as 4D imaging can be fully integrated into the system—while enabling innovative and evolving solutions to be effortlessly added as your future needs change.

Workflow Efficiency

The Antares system meets the minute-by-minute demands of your practice with an intuitive, logical user interface, immediate 4D imaging access, rapid transition between functions, and excellent DIMAQ-IP study management programs—including a built-in CD-R/W drive, for efficient and cost-effective output and archiving of exam data.

imaging

Doppler Sensitivity

Superb Doppler capabilities combine with excellent 2D, 3D and 4D technologies for best-in-class clinical performance. Excellent low-flow detection in superficial and deep applications advances the diagnostic precision of the Antares system across the clinical spectrum.

Proven Performance

The Antares system with *fourSight* 4D imaging delivers proven performance under the widest range of clinical challenges in institutions worldwide—providing an unmatched array of best-in-class capabilities that help ensure a higher level of diagnostic confidence today and tomorrow.
