

Siemens Physician Observational On-site Training Laurel Highlands Advanced Imaging MAGNETOM Espree

Description

The Physician observational on-site training program is a clinical educational opportunity over a 3 to 5 day period for the visiting physician (trainee). The program is informal in nature and does not include formal didactic lectures.

The visiting Physician trainee will have an on-site training experience tailored to their needs with the ability to

- Interact directly with the Laurel Highlands physicians daily
- Review clinical cases and discuss imaging strategies
- Observe daily scanning activities with support of a skilled MR technologist
- Become acquainted with protocols and post-processing techniques
- Review teaching cases at their own pace

Course Objectives

- Overview of the Siemens MAGNETOM Espree in clinical practice
- Patient examination and clinical workflow observation
- Protocol adaptations and imaging strategies
- Clinical case review

Audience

Radiologists experienced with interpretation of MR images seeking to increase their knowledge utilizing the MAGNETOM Espree system.
