

Basic MR Technologist On-Site Training

A one week on-site, hands-on training course for the technologist at a Siemens clinical site. This training provides an opportunity for the technologist to become familiar with the MR system they are about to receive in a clinical environment rather than a lab or simulated situation. This hands-on training moves along at the pace of the hospital or clinic in which the training takes place giving the student a real-life experience. For this reason, it is recommended that the technologist attend the syngo MR Level I course prior to participating in the hands-on training in order to be comfortable with the user interface and Siemens nomenclature. At the end of the training, the technologist will have demonstrated a checklist of skills and have a basic understanding of the MR system operation.

Basic On-Site Training Locations:

- **Medical Center Hospital** **Odessa, TX** **Avanto & Symphony**
- **Texas Healthcare** **Fort Worth, TX** **Symphony**
- **Turville Bay MRI** **Madison, WI** **Espreo**
Symphony, A Tim System
- **Battlefield Imaging** **Ringold, GA** **Espreo**
- **University of Utah** **Salt Lake City, UT** **Avanto**
Trio, A Tim System
- **Big Sky Diagnostic Imaging** **Billings, MT** **Trio, A Tim System**

Advanced Technologist On-Site Training

A 3 – 5 day on-site, hands-on training course in advanced imaging techniques for the syngo MR experienced technologist at a Siemens clinical site. The advanced hands-on training allows the syngo MR experienced technologist the opportunity to observe advanced techniques in Pediatrics, Breast, Abdominal, MR Angiography, Spectroscopy or Advanced Neuro applications with relevant post-processing functions. The topic and focus of this fellowship can be tailored to the needs of the attending technologist. The fellowship student will receive practical experience in a clinical environment at the pace of an imaging center or hospital. Due to the advanced nature of these applications, it is **required** that the technologist be proficient in the operation of the syngo MR software prior to attending this advanced fellowship.

Advanced On-site Training Locations:

- **Cedars-Sinai Medical Center** **Los Angeles, CA** **Symphony & Sonata**
 ❖ **Abdominal, MR Angiography, Breast, Spectroscopy, Adv. Neuro**
- **Children’s Hospital of Philadelphia** **Philadelphia, PA** **Avanto, Sonata &**
 ❖ **Pediatric & Fetal Imaging** **Trio, A Tim System**
