# Education Courses 2005

## Knowledge is the Key

### **Only knowledge is the true basis of your profession**

And only know-how makes it possible for you and your team to perform at maximum efficiency in your daily clinical efforts. However, information grows from day to day. What today is considered as fact, can be outdated tomorrow. Anyone who wants to work successfully, must remain on the leading edge of knowledge.

Siemens has an extensive education offering: Educate, our comprehensive learning program that is part of Life, the unique customer care solution that helps you get the most from your investment. Convince yourself. In this booklet, we present you with a selection from our courses.

Educate yourself with Siemens' education programs.

The continuous development of your  
skills, productivity,  
and technology

is what **Life** is all about.

Life is the unique customer care solution from Siemens that helps you get the most from your investment. From the moment of your purchase, Life surrounds you with an array of programs and support that enables the continuous

development of your skills, productivity, and technology. Allowing you to broaden your capabilities. Increase profitability. And take patient care to the next level.

# Skills

## Acquiring and sharing the knowledge you need to achieve optimal clinical value

Life helps you get the most value out of your system by maximizing your clinical know-how.

With a full range of continuous learning programs – from extensive start-up and technical training to applications support.

Designed to adapt to your needs, Life's personalized training includes web-based courses you can access at your convenience.

And you can learn in our workshops, fellowships, and symposiums with our clinical partners.

The page features a large, abstract orange shape on the left side that curves upwards and to the right. There are also grey rectangular blocks in the top-left and top-right corners.

Life will keep you fully up-to-date on the latest product development and case studies through our wide selection of customer magazines. It also offers you an exclusive, international user community where you can exchange best practices. You can share clinical methods, materials, images, and application tips. Consider future business, technology, and clinical market developments and participate in user groups where your opinion can be heard.

The sharper your skills, the better your performance.
